

NIKHIL PRAKASH MAHALE

Email: nikhilmahale456@gmail.com | Phone: [+91-8446482704](tel:+91-8446482704)

Location: Pune, Maharashtra

LinkedIn: <https://linkedin.com/in/nikhil-mahale-293987271> | GitHub: <https://github.com/nikhilhere7>

PROFESSIONAL SUMMARY

Computer Engineering student with hands-on experience in Python, SQL, data analysis, and machine learning through a data analyst internship and real-world projects. Skilled in exploratory data analysis, feature engineering, and building regression and classification models. Seeking a Data Scientist or Data Analyst role.

EDUCATION

DY Patil College of Engineering, Pune (SPPU), B.E. Computer Engineering - 2023 — 2027

- CGPA: 7.62/10

PROFESSIONAL EXPERIENCE

Data Analysis Intern, UptoSkills - Nov 2025 – Jan 2026

- Performed data mining, cleaning, and exploratory analysis on company recruitment datasets to extract actionable hiring insights
- Built interactive Power BI dashboards and recurring reports to help stakeholders monitor recruitment metrics and hiring trends

Co-Founder & Operations Manager, Veechimonk (E-Commerce) - Oct 2023 – Aug 2025

- Co-founded and operated an e-commerce clothing brand, managing 45+ products across sourcing, vendors, and fulfillment
- Built automated Excel/Power BI dashboards to track sales, inventory, and customer trend

TECHNICAL SKILLS

Languages: Python, SQL, C++ | **ML:** Pandas, NumPy, Scikit-learn, Regression, Classification, EDA

Visualization: Matplotlib, Seaborn, Power BI, Excel | **Tools:** PostgreSQL, Git, GitHub, Jupyter, VS Code

PROJECTS

LostMoney-AI (<https://github.com/nikhilhere7/LostMoney-AI>)

- Developed an AI-powered expense management platform to extract and categorize transactions from PDF, CSV, and Excel files.
- Implemented machine learning-based transaction categorization and deployed the application using Netlify and Railway.

Income & Expense Prediction (<https://github.com/nikhilhere7/Expenses-Income-Prediction>)

- Developed Linear Regression and Random Forest models to predict customer income and expenses from 12,000+ banking transactions.
- Applied feature engineering and visualized model insights using Matplotlib and Seaborn.

Telecom Customer Churn Analysis (<https://github.com/nikhilhere7/telecom-churn-analysis>)

- Performed EDA on 7,000+ telecom records to identify key churn drivers
- Cleaned data and engineered features to uncover actionable churn patterns

CERTIFICATIONS

- [Databases and SQL for Data Science with Python](#) — IBM / Coursera, 2025
- [Foundations: Data, Data, Everywhere](#) — Google / Coursera, 2024
- [Ask Questions to Make Data-Driven Decisions](#) — Google / Coursera, 2024
